Brief description of the PUBLIC AUCTION procedure

The sale of capital by Public auction is carried out by the Auction Commission, which is established by the Privatization Agency. The commission supervises the capital sale by auction, registers auction participants, declares auction unsuccessful, signs the minutes and performs other activities important for auction performance in accordance with the Law. The conditions for auction to be carried out are fulfilled if at least one person has obtained the status of an auction participant and if it is presented personally or by an authorized representative. At the time ordered for the PUBLIC AUCTION opening, the auctioneer shall open the first bidding, when the means of payment can be in cash or due bonds. If there is more than one person at the first bidding, the auctioneer announces the initial price as well as each further increase. In case that none of the interested buyers reacts after the third call for acceptance of the newly established price, the auctioneer

declares the auction finished by hammering. The selling price becomes the highest offered value, and the participant who has been the first to offer the highest price is declared a buyer. If there have not been interested parties after the announcement of the initial price, even after the third call, the auctioneer declares the first bidding unsuccessful by hammering and opens the second bidding immediately afterwards, when even undue state bonds can be the means of payment. Those who have applied for the second bidding can also participate, as well as the participants in the first bidding, in case it has been declared unsuccessful. If more than one person participates in the second bidding, the auctioneer announces the initial price, as well as each further increase. If none of the interested buyers reacts after the third call for acceptance the newly established price, the auctioneer, by hammering, declares the auction closed. The selling price becomes the highest offered value, and

the participant who has been the first to offer the highest price is declared a buyer. If after the announcement of the initial price there have not been any interested persons, even after the third call, the auction is declared unsuccessful, and the participants lose the right to be returned the deposit.

If only one party who has obtained the auction participant status attends the second bidding, that party is invited three times to accept the initial price. If the party accepts the initial price, it is declared a buyer and the initial price becomes the selling price. If the participant does not accept the initial price, the auction is declared unsuccessful, and it loses the right to be returned the deposit.
